Centre

On-line Educa, Berlin December 2-4, 2015

What are we going to talk about?

- TALOE web tool how to decide on the eassessment strategies to use in online courses
 - how to use it?
 - what is the theoretical background of the tool?
 - who has prepared the tool?

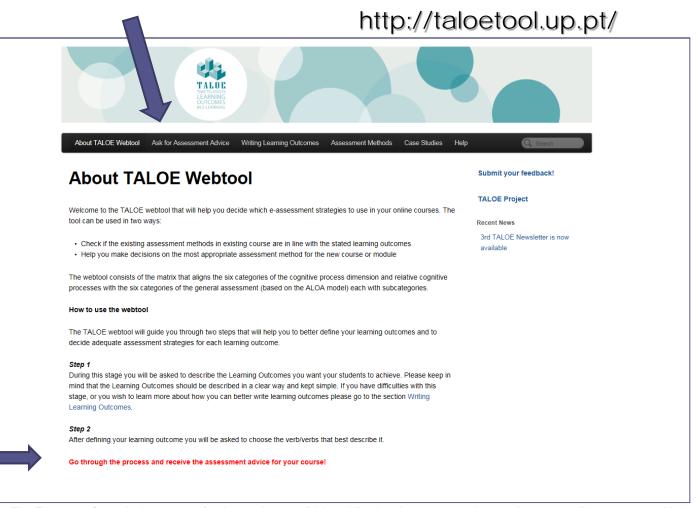

What can you do with the tool?

- Check if the existing assessment methods in courses are in line with the stated learning outcomes
- Use it as help in decision on the most appropriate assessment methods for the new course or module

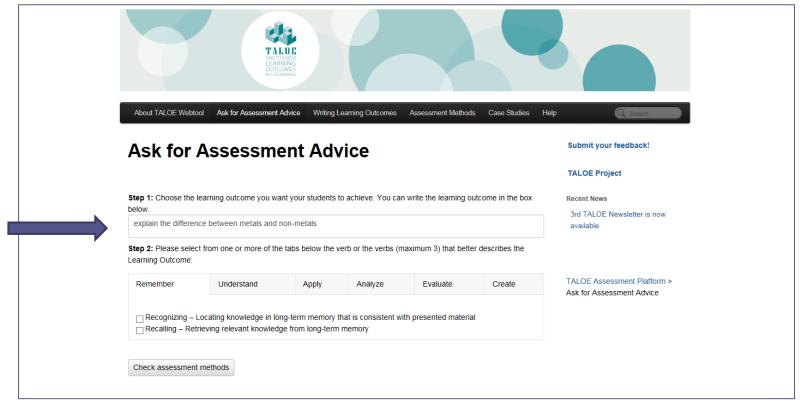

How to use TALOE web tool

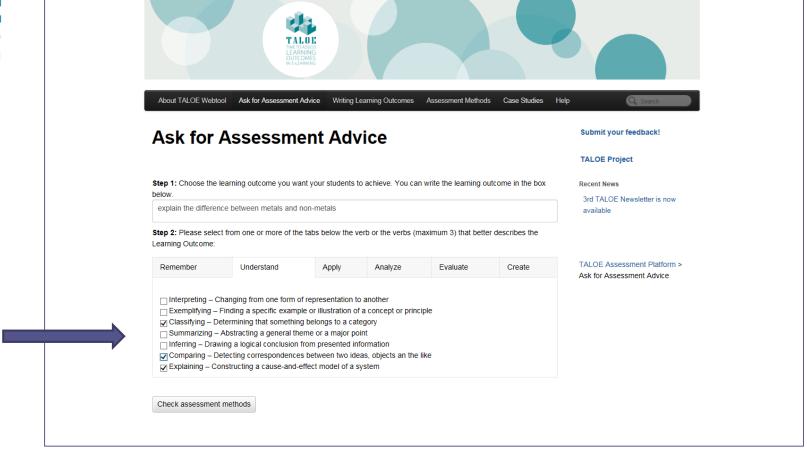

Write your learning outcome

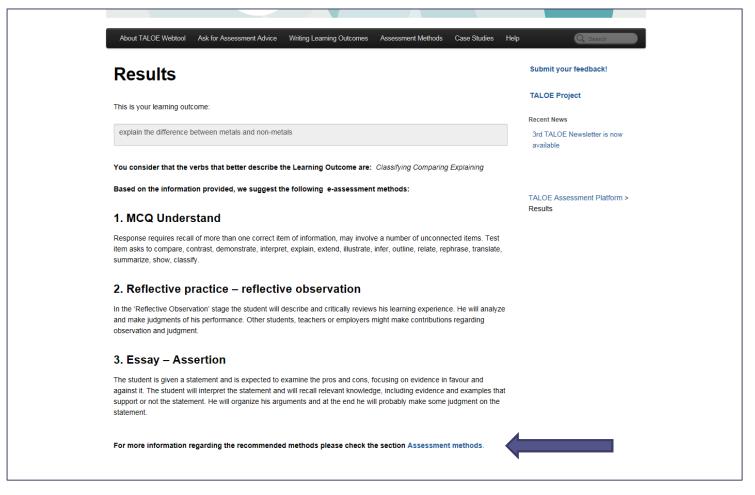

Select three verbs that describe the LO

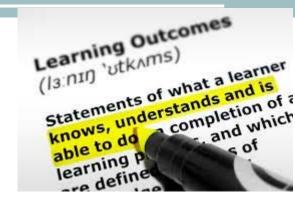

Results

About learning outcomes

- A learning outcome (LO) is the specification of what a student should learn as the result of a period of specified and supported study
- Outcomes are usually expressed as knowledge, skills, or attitudes
- They can be defined at different levels:
- LO of the study programme
- LO of the course
- LO of the module

Learning Outcomes should be

Stated from the student's position

- Student will understand the nine reasons for conducting a need assessment
- Student will be able to explain advantages and disadvantvages of on-line communication

Observable and measurable

- Student will be able to list nine reasons for conducting a need assessment
- Student will be able to summarize three major groups of learning theories and their representatives/authors of some theories

Constructive alignment

- a principle used for devising teaching and learning activities, and assessment tasks, that directly address the learning outcomes intended in a way not typically achieved in traditional lectures, tutorial classes and examinations (Biggs and Tang, 2011).
- Approach where planning of the course starts with clear vision of learning outcomes
- LO of the course should be aligned with content and activities in course and with assessment methods

(Table adapted from Anderson and Krathwohl, 2001, pp. 67–68.)

E-assessment - definition

- e-Assessment is the end-to-end electronic assessment processes where ICT is used for the presentation of assessment activity, and the recording of responses. This includes the end-to-end assessment process from theperspective of learners, tutors, learning establishments, awarding bodies and regulators, and the general public. (JISC/QCA)
- e-assessment refers to assessment methods and practices that emphasize the role of information technology relative to measuring students' learning.

Advantages of e-assessment

- immediate feedback to students,
- allows rehearsal and revision,
- immediate feedback to staff,
- allows evaluation of a course's strengths and weaknesses,
- can be linked to other computer-based or online materials.

About the TALOE Team

- University of Porto, Portugal
- Dennis Gabor College, Hungary
- University of Zagreb, Croatia
- University of Padova, Italy
- National Distance Education University, Spain
- Innovate4Future Center for Advanced Educational Solutions, Romania
- Information Technology Foundation for Education, Estonia
- European Distance and E-Learning Network - EDEN, United Kingdom
- European University Continuing Education Network - EUCEN, Belgium
